

# A 25

## ESPALHADORES DE ESTRUME DE POMARES E VINHEDOS A25

## ORCHARD & VINEYARD MANURE SPREADER

This manure spreader for orchards and vineyards has a small size, specific for use between narrow lines. The manure is located at the foot of the trees, with an adjustable spread length of 1 to 4 meters. For easier entry and exit from the queue, on request, the machine can be equipped with a mechanical steering rudder to reduce operating space (track the tractor). Can be used with any type of organic fertilizer (manure, compost, digested, vegetable waste, etc.). The amount of product to be spread is adjustable.
